PROFILE

Frontend engineer building React, Next.js and TypeScript applications across enterprise ERP, DeFi, fintech and e-commerce. At Hilo Group, leads frontend architecture and delivery for an ERP micro-frontend platform using React 19, Vite Module Federation and shared libraries. Previously worked on Web3 integrations, KYC and banking modules, and Shopify/Printify integrations. Focused on maintainable architecture, cross-functional delivery and clear technical documentation.

EXPERIENCE

Frontend Engineer | Lead Frontend ERP Project

Jan 2026–Present

Hilo Group · Ho Chi Minh City, Viet Nam

- Lead frontend architecture for the Hilo ERP Admin micro-frontend monorepo using React 19, TypeScript, Vite Module Federation and pnpm/Turbo; applications include HR, Employee, Sales, Finance, Product and Shell.
- Design and maintain shared libraries (@hilo/ui and @hilo/shared), including attendance utilities, async comboboxes and responsive DataTable components.
- Deliver HR features including employee import/export, attendance and leave management, organizational structure and HRM settings, using DTO-first design and URL-driven state management.
- Work on the Shell application layer, including authentication, WebSocket notifications and Zalo Mini App integration; document feature-sliced architecture and implementation conventions.

Front-end Developer

May 2024–Oct 2025

GreenSoftware Asia · Ho Chi Minh City, Viet Nam

- Developed frontend modules with Next.js and TypeScript across DeFi, fintech and e-commerce projects.
- Helped define project structure and coding conventions, participated in code reviews, built REST API and Web3 integrations using wagmi, and developed custom admin dashboards.
- Integrated Shopify and Printify services; collaborated with Design and Backend teams in an Agile environment.

SELECTED PROJECTS

- Vinachain Swap · swap.vinachain.io — Developed a staking interface and contributed to migrating the legacy Web3 integration to wagmi.
- Weex Trade · weex.info — Developed core frontend modules, including KYC and banking, for a crypto trading platform.
- Podbrick · podbrick.com — Built a real-time product customizer and integrated Shopify and Printify APIs.
- Đại Việt Sử Ký · daivietsuky.com — Developed a GameFi portal connecting to a mobile game through wallet addresses, including token-based purchases and a VPC-to-Ruby swap gateway.

TECHNICAL SKILLS

Frontend: React 19, Next.js, TypeScript, Vite, Module Federation, TailwindCSS, shadcn/ui
State & data: Zustand, React Query, Redux Toolkit, REST, GraphQL, WebSocket
Integrations: Web3 / wagmi, Shopify, Printify, Zalo Mini App
Delivery: pnpm/Turbo monorepo, Vitest, GitLab CI, Docker, shared libraries, code review, technical documentation, feature-sliced architecture
