

LUU KHOA HOC

FRONTEND ENGINEER / TECHNICAL DELIVERY & COORDINATION

Ho Chi Minh City, Vietnam · +84 778 978 372 · luukhoahoc.work@gmail.com
luukhoahoc.dev · linkedin.com/in/luukhoahoc · github.com/LuuKhoaHoc

PROFILE

Frontend engineer combining hands-on React and TypeScript delivery with ERP work tracking, merge-request reviews and cross-team coordination. Contributes to release-scope planning and risk follow-up while working with backend teams on API integration.

DELIVERY STRENGTHS

Frontend architecture · Work tracking and dependencies · Cross-functional collaboration
MR review · Release-scope and risk follow-up · API integration · Agile workflows

EXPERIENCE

Frontend Engineer (ERP Frontend Lead)

Jan 2026–Present

Hilo Group · Ho Chi Minh City

- Lead frontend delivery for a React 19 and TypeScript ERP microfrontend platform across shared libraries, HR modules and the application shell.
- Develop attendance, leave, employee and organizational features in collaboration with backend counterparts.
- Work on authentication, WebSocket notifications and Zalo Mini App integration within the application shell.
- Track frontend work, dependencies and MR review status across ERP modules; consolidate progress for BA/PO reporting.
- Contribute to milestone and release-scope tracking; flag test, API integration and rollout risks, including keeping unfinished CRM outside an HRM-only release plan.

Front-end Developer

May 2024–Oct 2025

Greensoftware Asia · Ho Chi Minh City

- Delivered frontend features in cross-functional Agile work across DeFi, fintech and e-commerce products.
- Vinachain Swap: developed a staking interface and migrated Web3 integration to wagmi.
- Weex Trade: built KYC and banking modules for a crypto trading platform.
- Podbrick: built an interactive product customizer integrated with Shopify and Printify.
